PLUS LINE

Breeding and technological progress as well as the ever increasing environmental requirements in pig breeding pose new challenges for breeders, but also opportunities. Modern genetic lineages of pigs allow for very high production results. EKOPLON offers products designed based on the latest knowledge in the field of nutrition, breeding and genetics.

PLUS LINE – modern products for farms with high production potential for animals with high nutritional requirements. This line is aimed at breeders who want to achieve maximum technical results in their breeding.

The PLUS line products allow for individual adaptation to the needs of the farm. They feature a high content of nutrients and ensure maximum gains, low feed consumption, high meatiness, excellent reproduction and numerous litters while maintaining the health of the herd. The applied probiotics, organic acids and plant extracts have a positive effect on the health of the herd, and a healthy herd allows for maximum production and economic results.

PIGLETS AND WEANERS

FEATURE

Excellent palatability thanks to the high proportion of dairy products, fish meal, sugars and sweeteners.

Addition of selected, micronized protein and cereal components.

Complex of organic acids and probiotics.

High concentration of nutrients.

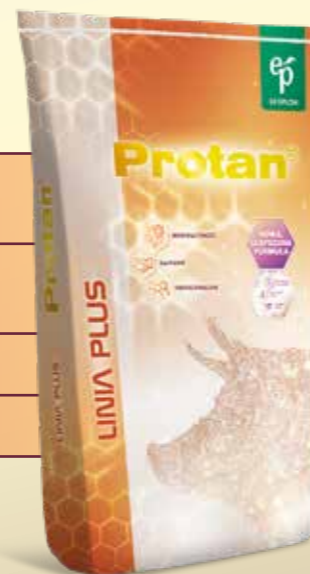

BENEFIT

Piglets eat the feed very eagerly.

Excellent feed digestibility.

Healthy piglets.

Dynamic gains.

● **PROTAN PLUS PW 25%** **NEW**

PORKERS

FEATURE

High concentration of nutrients.

Amino acid profile extended with valine and isoleucine.

Organic acid complex.

Added selected feed enzymes.

BENEFIT

Intense growths.

Low feed consumption.

Healthy herd.

Excellent digestibility.
